City of South Bend, Indiana
Popular Annual Financial Report (PAFR)

For the Year Ended
December 31, 2016

Prepared by the Department of Administration & Finance
Message from the Mayor:

June 30, 2017

Dear residents and visitors of the City of South Bend,

As with any large organization, management has a duty to provide meaningful reports that summarize the organization’s condition within its current environment to its executive board.

In that spirit, I am pleased to present the City of South Bend’s second Popular Annual Financial Report (PAFR) to you, the City’s ultimate executive board. The PAFR contains information about the City and its finances in a user-friendly format that is easier to digest and understand than the City’s 318-page Comprehensive Annual Financial Report (CAFR). The financial information presented herein is excerpted from the CAFR and I encourage readers interested in more detail to refer to that document for further information.

The City is delighted to announce that its 2015 PAFR received an award for outstanding achievement in Popular Annual Financial Reporting from the Government Finance Officers Association.

2016 was a year of progress for the City of South Bend. The population of our City increased as more people discovered the advantages of Midwestern urban living. The City made strides in important signature community development projects including increased residential and commercial development in the downtown area, the enhancement of neighborhoods and school safety with curb, sidewalk and lighting projects, and ongoing construction of the “Smart Streets” conversion of one-way streets to two-way with the objective of enhancing economic activity. During 2016, the City enjoyed the completion of the renovated, historic LaSalle Apartments and the start of construction of the new Courtyard by Marriott hotel (by the former College Football Hall of Fame), the conversion of the JMS Building to residential uses, and the massive renovation of the former Chase Tower. At the same time, the City maintained its financial strength as evidenced by its strong AA bond rating, one the best for cities of its size in Indiana.

The City of South Bend is interested in your feedback so we may improve the PAFR in future years. I welcome your comments and suggestions on behalf of the Administration & Finance Department and encourage you to contact John Murphy, CFO at (574) 235-7678 or Jennifer Hockenhull, City Controller at (574) 235-9822.

With Highest Regards,
Pete Buttigieg, Mayor
City of South Bend

The goal of a business venture is to provide income for its stakeholders. In contrast, the goal of government is to provide services to its citizens. The measurement of success in business is a positive “bottom line”: revenue exceeds expenses. But the measurement of success for a government is the ability to serve its population within its financial constraints. And unlike a business, the government is prohibited by law from allowing expenditures to exceed budgeted limitations.

Like any city in the United States, South Bend uses “fund-based” accounting. A “fund” is a segregated group of resources that have been identified to meet a specific purpose. A fund is just like a checkbook: cash receipts and disbursements are recorded in it and, like a checkbook, the City strives to maintain a positive balance.

Broadly speaking, there are two main types of funds: governmental funds and business-type funds. **Governmental funds** are used to account for basic services: police and fire protection, street maintenance as examples. We all pay for these services through our tax dollars so that they’ll be available to any of us who need them, whenever we need them.

**Business-type funds** are run like a business. They charge only the people who use the service and are expected to have revenues cover their operating expenses as well as any loan payments. In South Bend, these funds include Water Works, Wastewater, Solid Waste, Century Center and the EMS system.

Across all funds, there are inflows and outflows; revenue and expenses, or expenditures.

**Revenue** is the sum of money coming in to the City. The main sources, as noted above, are tax dollars and charges for services. Revenue also includes proceeds from new debt, such as a bond to finance a construction project. Each of these sources can be further broken down, as you’ll see in later pages.

**Expenditures** are the costs of the City and are divided into three main types: operating, debt service and capital outlay. Operating expenditures are the costs for salaries and supplies needed to provide the services. These expenditures are ongoing, in that they will be incurred year after year as the City performs its services, but the amounts may change significantly based upon the level of services the City administration chooses to provide.

*Debt Service* comprises the principal and interest payments made to repay the City’s debt obligations. Before the City can apply for any new debt, it must be able to prove that it will be able to repay that debt along with any prior debt still outstanding. These expenditures are ongoing as well, but the amounts are stable, based on the repayment schedules negotiated at the time the debt was incurred.

*Capital outlay* expenditures can be either large, one-time expenditures, such as a new building, or smaller annual expenditures such as new vehicle purchases within a fleet maintenance program. These expenditures can vary widely year to year, based on current requirements.

With these broad definitions in mind, we hope that you’ll find the foregoing reports meaningful and interesting.

Revenue from **Governmental Activities** totaled $152.7 million in 2016. The largest revenue sources were property taxes and local income taxes. Property taxes are capped at approximately 1% of property values for homeowners.

Revenue from **Business-Type Activities** totaled $75.5 million in 2016. The Wastewater and Water Utilities were the largest Business-Type funds and provide essential services to residents. Solid Waste provides trash collection services on a weekly basis and EMS provides emergency ambulance services to residents in need.
Total Expenses for **Governmental Activities** was **$134.5 million** in 2016.

The largest category was Public Safety (police and fire) followed by Economic Development, Streets, and Culture & Recreation. During 2016, the Venues, Parks & Arts Department was established to manage culture and recreation activities City-wide.

Total Expenses for **Business-Type Activities** was **$64.1 million** in 2016.

The largest Business-Type activities are the Wastewater and Water Works operations, which charge fees for services rendered. Solid Waste provides trash collection services that are essential to City residents. The City also manages three downtown parking garages and owns the Century Center convention venue located on the Saint Joseph River.
For 2016, the City's Net Position was $365.3 million.

"Net Position" is the difference between the City's assets and its liabilities. It represents resources currently available to the City for future services and economic safety buffers.

The majority of Net Position consists of investment in capital assets and is, therefore, not able to be spent on governmental programs and services.

Net Position declined from 2013 to 2014 due to new accounting rules for recording pensions.
Changes
2015 to 2016

Governmental Activities expenses decreased from 2015 to 2016 due to lower capital expenditures and lower general administrative expenses.

Changes
2015 to 2016

Property tax revenue increased during 2016 due to higher property values and collections. Local income tax revenue increased due to an improving economy and a one-time state distribution of income tax monies held in reserve.
The City’s total debt obligation at the end of 2016 was $435.7 million and long-term debt decreased by $23.4 million during 2016.

The City’s use of debt allows it to leverage current resources to buy or construct assets to be used in the future, such as the lease of police cars or the construction of infrastructure. These arrangements allow the City to pay for the vehicles or infrastructure during the periods in which the residents receive the benefits of the services.

The largest segment of the City’s debt is its pension and other employment liability. In 2016, the City’s Net Pension Liability was $180.7 million. The City is required to contribute 11.2% of annual payroll for non-bargaining and Teamster employees, and 17.5% for Police and Fire department employees. Pension liabilities are funded over a long-term time period.

Most Capital Leases require a 5-year repayment schedule. The goal is to pay off the lease in less time than the expected useful life of the asset being leased. Bonds and other loans have a longer repayment period, typically 20 years; this is appropriate since they are used to pay for longer-lasting assets such as buildings, roads, and other infrastructure.

In 2016, the City’s expenditures toward debt repayment were $23.1 million, 11.6% of government-wide expenses.

During 2016, the City initiated the following debt transactions:
- Entered capital lease transactions of $8.9 million to purchase vehicles and equipment.
- Issued Water Works refunding bonds of $3.3 million to refinance existing debt at a lower interest rates.
