**Re: Soil Remedial Excavation Completion Report  
Green Tech Park Retention Pond  
Green Tech Transfer and Recycling Station  
2500 Green Tech Park Drive  
South Bend, Indiana, 46613  
Brownfields Site #4060009**

Dear Mr. Wieringa:

Quality Environmental Professionals, Inc. (Qepi) is pleased to provide the Indiana Finance Authority's (IFA) Indiana Brownfields Program (IBP) with this Soil Remedial Excavation Completion Report for the above-referenced facility. Qepi's scope of work, which proposed the excavation of approximately 2,500 cubic yards of lead impacted soils on the bottom surface of the Green Tech Park retention pond was included in its grant application to the IFA dated April 28, 2008, and was approved by the IBP. This soil remedial excavation was performed under a 2008 Indiana Finance Authority (IFA) Brownfields Stipulated Remediation Grant (SRG) award provided to the City of South Bend (City) on the behalf of the property owner, Mother Earth, LLC. This document has been prepared for the use of the City, Mother Earth, LLC, the IBP and the Indiana Department of Environmental Management (IDEM).

### ***Project Background***

The Green Tech Park facility consists of a solid waste transfer and recycling facility. The facility is located at the former Studebaker Plant 8 property, formerly addressed at 408 West Eckman Street in South Bend, Indiana. The former Studebaker Plant 8 facility consisted of an approximately 770,000 square foot structure which operated as part of the Studebaker Corporation. The facility also operated as part of AM General and LTV Aerospace and Defense Company. The site had been used for various automotive related manufacturing operations from at least the mid 1920's through the late 1980's. The site was vacated in 1989. The site is located on approximately 33 acres. Bowman Creek runs along the western boundary of the site, and empties into a triangular shaped retention pond, located immediately north of the former building footprint. A site location map is included as Figure 1. A site map depicting the layout of the property is included as Figure 2.

The site remained vacant from 1989 to 2006, when it was acquired by Mother Earth, LLC for redevelopment. The former manufacturing structure on the property was demolished in 2007. Site construction activities included the construction of the new recycling depot, which began

operations in 2008.

Site assessment activities conducted throughout the subject site and the surrounding area have encountered surface impacts to soil in the form of total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs) and heavy metals. Groundwater impacts have been delineated, with the potential source of groundwater impacts determined to be migrating from offsite. Site assessment activities are being conducted at the surrounding sites to determine the extent of the regional impacts to soils and groundwater in the area. In a letter dated November 19, 2007, the IBP issued a Comfort Letter to Mother Earth, LLC, providing Mother Earth, LLC with liability protection. The Comfort Letter outlined guidance for Mother Earth, LLC to adhere to during redevelopment activities to maintain IBP owner protection. The guidance included:

- Owner must refrain from the installation of new potable water wells;
- Owner must not use site for residential purposes, including but not limited to daily care facilities;
- Owner must not use site for agricultural purposes;
- Owner must maintain a ground cover of at least 24 inches of soil or 2 inches of asphalt/concrete in areas where surface levels of trichloroethene (TCE) were shown to exceed IDEM Direct Contact Cleanup Levels;
- Owner must restrict disturbance of soils beneath 16 feet below ground surface (bgs) without prior notification to IDEM; and
- Owner must refrain from disturbing sediments in Bowman Creek and/or the Retention Pond unless IDEM has approved a work plan for such activities.

During the course of construction activities, Mother Earth, LLC determined the need for increased retention and aesthetic improvement of the retention pond. After consultation with the IBP, it was concluded that any disturbing of the pond soils would need to be conducted under proper IDEM protocol. Soils would need to be excavated and disposed of properly as special waste. The IBP Project Manager confirmed that after proper removal and disposal of these pond soils, the IBP issued Comfort Letter could then be amended to remove the guidance against pond disturbance, and allow for further construction of retention area within the pond. A copy of the IBP Comfort Letter provided to Mother Earth, LLC is included as Attachment A.

Based on previously conducted surface and subsurface investigations at the site, it had been previously determined that lead impacts above IDEM Risk Integrated System of Closure (RISC) cleanup levels existed in the surficial soils underlying the retention pond waters. Surficial impacts were determined to exist at a depth no greater than 3 feet bgs.

Subsequently, in April 2008, Qepi submitted to the IFA and the IBP its SRG application, which included a scope of work to excavate and dispose of approximately 2,500 cubic yards (approximately 3,250 tons at a conversion factor of 1.3 tons per cubic yard) of lead impacted soils on the bottom surface of the retention pond to a maximum depth of 2.5 feet bgs. In a letter dated November 24, 2008, the IFA approved the grant application and the included scope of work.

## *Soil Excavation*

Qepi provided oversight for excavation of 3,784.04 tons of lead impacted soil from the surface area of the retention pond from August 13, 2009 through September 16, 2009. A site map depicting the extent of the excavation is included as Figure 3. The soil excavation parameters included the entire extent of the retention pond, extending north to Bowman Creek, east to Green Tech Park Drive, south to the asphalt parking lot and west to the cessation of the pond surface area. Prior to the onset of the soil excavation, the channels feeding Bowman Creek through the retention pond area was dredged, allowing for the drying of the surface area of the pond. Sufficient time was given to allow for the drying of the pond area prior to the removal of soils. During removal and disposal activities, rainfall events caused delays in work activities. Excavating and removal activities were conducted from August 13 through August 15, 2009, then from September 9 through September 16, 2009.

The surface area of the retention pond was excavated to a maximum depth 3.5 feet bgs. Additional soil was removed in a limited area past the original depth of 2.5 feet bgs due to the presence of elevated lead impacts in the first set of bottom confirmation samples collected. Prior investigations indicated elevated lead impacts were present throughout the extent of the surface area of the retention pond. As such, soil removal was conducted encompassing the entire pond area. Photographs taken of soil excavation and removal are included in Attachment B.

The goal of the soil excavation was to remove lead impacted soils located on the bottom surface area of the retention pond and also to eliminate the source of potential groundwater impacts exceeding IDEM RISC cleanup objectives. Prior to the onset of the soil excavation, a total of 20 bottom samples (BOT-1 through BOT-20) were collected from the excavation area. The 20 samples were collected centrally from equally spaced grid areas previously approved by the IBP. The bottom samples were obtained at a depth of 2.5 feet bgs, as originally scoped. Excavation confirmation samples collected were submitted to Envision Laboratories, Inc. (Envision) of Indianapolis, Indiana for laboratory analysis of lead using United States Environmental Protection Agency (USEPA) SW-846 Method 6010B.

Based on the results of these bottom confirmation samples, 11 of the 20 bottom samples collected exhibited impacts exceeding IDEM RISC Industrial Default Cleanup Levels (IDCLs), with an additional 3 samples exhibited impacts below IDCLs but above IDEM RISC Residential Default Closure Levels (RDCLs). Based on the scope of work, the entire grid area was excavated down to 2.5 feet, after which the 14 grid areas determined to contain further impacted soils were excavated down to 3 feet bgs. Confirmation samples were collected from each of these areas (BOT-1B, BOT-6B, BOT-7B, BOT-9B, BOT-10B, BOT-11B, BOT-12B, BOT-13B, BOT-14B, BOT-15B, BOT-16B, BOT-17B, BOT-18B and BOT-20B).

Based on the results of these bottom confirmation samples, 1 of the 14 samples (BOT-11B) collected exhibited impacts exceeding IDEM RISC IDCLs. None of the other samples collected exhibited impacts exceeding IDEM RISC Cleanup levels. This grid area, Grid 11, was excavated

November 6, 2009

Mr. William Wieringa

Indiana Brownfields Program

Re: Green Tech Park Retention Pond Soil Remedial Excavation Completion Report

Brownfields Site #4060009

Page 4 of 5

further to a depth of 3.5 feet bgs. An additional soil confirmation sample (BOT-11C) was collected from this grid. This sample did not exhibit impacts exceeding IDEM RISC Cleanup levels. The locations of the grid areas and the bottom samples are depicted on Figure 4. Analytical results from the excavation samples are depicted on Figure 5 and summarized on Table 1. Copies of the laboratory analytical reports from the samples are included as Attachment C.

It should be noted that based on the layout of the retention pond, the excavation parameters were limited to the Bowman Creek concrete channel to the north, Green Tech Park Drive to the east, an asphalt parking area to the south, and the cessation of the pond surface area into Bowman Creek and adjacent forested areas to the west. Due to these limiting barriers, further excavation of soils was not feasible beyond these limits. After consultation with the IBP and IDEM, it was determined that sidewall confirmation sample collection was not necessary, as the primary purpose of the remedial excavation was the removal and disposal of impacted soils on the pond surface area.

### ***Waste Disposal***

Excavated soil was transported to the Southeast Berrien County Landfill in Niles, Michigan. Qepi, prior to disposal of excavated soils, collected four composite samples of the pond soils and submitted for analysis at Envision for Total Characteristic Leaching Procedure (TCLP) lead. These samples were collected to determine waste disposal categorization. Based on these sample results, the lead concentrations in the soil were determined to be non-hazardous. As such, soils were disposed of as non-hazardous special waste. Soil disposal manifests for excavated soils are included as Attachment D. A copy of the TCLP lead analytical report is included as Attachment E.

### ***Conclusions***

Based on the soil excavation activities conducted at the site, results of the soil confirmation bottom samples and the redevelopment plans at the site, Qepi believes soil remedial cleanup objectives set forth at the onset of the remedial activities at the site have been achieved. Therefore, Qepi, on behalf of the City and Mother Earth, LLC, is requesting amendment of the Comfort Letter issued to Mother Earth, LLC, to remove the stipulation regarding the retention pond and to allow for the further development of the pond area for increased retention and beautification.

Re: Comfort Letter  
Mother Earth Minor Subdivision  
(Former Studebaker Plant 8)  
408 West Eckman  
South Bend, St. Joseph County  
BFD# 4060009

Dear Mr. Morris:

In response to the request to the Indiana Brownfields Program ("Program") by Mother Earth, LLC ("Mother Earth") for assistance concerning the former Studebaker Plant 8 site located at 408 West Eckman ("Site"), South Bend, St. Joseph County, the Indiana Department of Environmental Management ("IDEM") has agreed to provide this Comfort Letter to address applicable limitations on liability for environmental conditions on the four (4) parcels that comprise the Mother Earth Minor Subdivision that make up the project Site. Though not a legal release from liability, this letter will help to establish whether environmental conditions on the Mother Earth parcels might be a barrier to development or transfer.

The Site consists of four (4) parcels (Lots 1, 2, 3 and 4) totaling approximately 34 acres located at 408 West Eckman Road. See Site Map (attached hereto as Exhibit "A"). The Site is currently owned by St. Joseph County as one (1) parcel which has been subdivided for purchase by Mother Earth, LLC as the prospective purchaser of Lots 1, 2 and 3 and 4 ("Prospective Purchaser").

The proposed future use of the Site is a mixed use of offices, an environmental education center, a solid waste transfer station/recycling processing facility, manufacturing and warehousing. Historical uses include heavy industrial operations and a wooded lot. Surrounding properties consist of the Sibley Foundry to the east, a municipal baseball park to the north, and the former AM General Complex ("Studebaker Commerce Center") to the west and south of the Site.

Although this letter does not provide a release from liability, it clarifies IDEM's position on the liability of the Prospective Purchaser and provides information with respect to some of the criteria the Prospective Purchaser must satisfy to qualify for status as bona fide prospective

purchaser ("BFPP") under Section 101(40) of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"). 42 U.S.C. §9601, *et seq.* Under Indiana Code ("IC") Section 13-25-4-8(a), which bases liability on Section 107(a) of CERCLA, a person that is liable under § 107(a) of CERCLA is liable to the state in the same manner and to the same extent. Under §107(r) of CERCLA, a BFPP is not liable under § 107(a) as long as the BFPP does not impede the performance of a response action or natural resource restoration. 42 U.S.C. § 9607(r). Thus a prospective purchaser that satisfies CERCLA §§ 101(40) and 107(r) would not be liable under CERCLA §107(a) or IC §13-25-4-8(a). Please note that the BFPP provisions of CERCLA contain numerous conditions, many of which are ongoing obligations. In order to receive the protections afforded by applicable statutes and this letter, you must continue to meet the ongoing obligations required by the applicable statutes.

The BFPP provisions of CERCLA require a person to meet the criteria of CERCLA §§ 101(40) and 107(r) to be protected from liability. To qualify as a BFPP, a person must (among other requirements) make "all appropriate inquiries" into the previous ownership and uses of the facility and take "reasonable steps" with respect to stopping continuing releases, preventing threatened future releases, and preventing or limiting human, environmental, or natural resources exposure to earlier releases. *See* 42 U.S.C. § 9601(40). The Prospective Purchaser has provided IDEM with several reports and taken many steps to satisfy these criteria which are discussed in detail below.

As part of Mother Earth's request for assistance in determining any existing environmental impacts and potential liability at the Site, Program staff have reviewed data from the following reports:

- "Phase I Environmental Site Assessment" ("Phase I") BCA Consultants ("BCA"), May 2006
- "Asbestos Abatement Report" BCA, November 2006
- "Phase II Site Assessment" ("Phase II") Hull and Associates, Inc. ("Hull"), December 29, 2006
- "Monitoring Well Sampling Report" ("Monitoring Well Report"), July 27, 2007

BCA's Phase I report identified one (1) recognized environmental condition ("REC") which included the migration of petroleum contamination via ground water onto the Site from the former AM General Complex. Based on field observations, additional concerns relating to asbestos in the buildings located on the Site, a gasoline underground storage tank ("UST") previously located at the Site, and general state of disrepair of the Site, including trash accumulation, were not determined to be RECs.

As part of the Phase II Site investigation, 20 push probe borings were completed to a depth from 5 to 40 feet below ground surface ("bgs") and thirty-six soil samples were collected. The samples were submitted for analysis of total petroleum hydrocarbons- gasoline range organics ("TPH-GRO"), TPH-diesel range organics ("TPH-DRO"), volatile organic compounds ("VOCs"), semi-volatile organic compounds ("SVOCs") and metals. Nine ground water samples were also collected for analysis of TPH-GRO/DRO, VOCs, SVOCs and metals. All constituents that were

detected above the IDEM January 2006 Risk Integrated System of Closure ("RISC") Residential Default Closure Levels ("RDCLs") are listed in the attached Table 1.

During the July 2007 Monitoring Well Report field work, BCA collected three (3) stream sediment samples from Bowman Creek and a retention pond which runs through the Site. The three sample locations contained detected lead levels of 123 parts per million ("ppm") (upstream), 561 ppm (midstream) and 864 ppm (downstream from retention pond). Although IDEM has not established closure levels for sediment, for comparison's sake the levels were evaluated against IDEM RISC commercial/industrial closure level for migration of lead contamination from soil to ground water ("migration to ground water") of 230 ppm, the commercial/industrial closure level for direct contact with lead contaminated soil ("direct contact") of 1,300 ppm, and the IDEM January 2006 RISC Commercial/Industrial Default Closure Level ("IDCL") for lead of 230 ppm. By comparison, the midstream and downstream samples exceed the RISC migration to ground water level and the IDCL. The levels of lead detected in the sediment samples did not exceed either the RISC closure level for construction worker exposure of 970 ppm or the commercial/industrial closure level for direct contact of 1,300 ppm. *See Table 1.*

Based on the sampling results and ground water flow direction data, methylene chloride and the petroleum-related compounds with levels above RDCLs (TPH-GRO, TPH-DRO, 2-methylnaphthalene and benzo(o)pyrene, benzene; *see Table 1*) appear to be associated with the documented plume in the southwest corner of the Site which emanates from the former AM General Complex. Other contaminants also above RISC RDCLs such as arsenic lead, mercury, and trichloroethene (TCE) in the soil and ground water appear to be related to past on-Site industrial operations and the foundry sand and slag fill underlying the Site. The detections of lead in sediment appear to be from historic impacts from on-Site foundry sand and slag fill and off-Site runoff from surrounding industrial facilities.

Following the review of the above-referenced reports, Program staff concluded that at present there are no potential exposure pathways to soil and ground water contamination on the Site. In summary:

- (1) no evidence of a source of the contaminants identified in ground water samples collected from MW-3, MW-GP81, MW-325 and SB-6 exists on the Site,
- (2) contaminants located at the southwest boundary of the Site appear consistent with ground water transport from an off-Site source to the west, west south-southwest, and south, and
- (3) Soils containing TCE and metals are related to on-Site former industrial operations and foundry sand and slag fill underlying the Site.

Consistent with the *Property Containing Contaminated Aquifers Non-Rule Policy Document*, W0047 (January 30, 1997) (Contaminated Aquifers Policy), IDEM will not hold an owner, lessor, or tenant of a property responsible for contamination that migrates onto or through the property solely from an off-Site source. Based on the information submitted to and reviewed by IDEM, IDEM concludes that:

- (1) the detected petroleum contamination has come to be located on the Site solely as the result of subsurface migration in an aquifer from a source outside of the boundaries of the Site;
- (2) the Prospective Purchaser has neither caused, contributed to, or exacerbated the release or threat of release of the petroleum contamination; and,
- (3) no direct or indirect contractual relationship exists between Mother Earth and the party or parties responsible for the petroleum contamination.

IDEM also concludes that the Prospective Purchaser has demonstrated to IDEM's satisfaction that:

- (1) no state or federal enforcement action is pending at the Site;
- (2) no federal grant requires an enforcement action at the Site;
- (3) no condition on the Site constitutes an imminent and substantial threat to human health or the environment; and,
- (4) neither the Prospective Purchaser, nor an agent or employee of the Prospective Purchaser, caused, contributed to, or knowingly exacerbated the release or threat of release of any hazardous substance or petroleum at the Site.

Additionally, based on the information submitted to or otherwise reviewed by IDEM and consistent with the conditions of the Contaminated Aquifers Policy, IDEM has decided that should the Prospective Purchaser proceed with acquiring title(s) to the parcels that comprise the Site, IDEM will exercise its enforcement discretion to forego pursuit of the Prospective Purchaser (or any successor owners and operators that also satisfy the conditions of this letter and the Contaminated Aquifers Policy) for response costs relating to, or require them to respond to, the past release of the petroleum contaminants described in this letter at the Site.

Additionally, IDEM has determined that the Prospective Purchaser has satisfied all appropriate inquiries and undertaken (or has to plans to undertake) reasonable steps at the Site as required by CERCLA §§ 101(40)(B), (D). Therefore, having satisfied the requirements of CERCLA §§ 101(40)(B) and (D), in addition to the other criteria of CERCLA § 101(40), as well as CERCLA § 107(r), IDEM has determined that it is prohibited from pursuing the Prospective Purchaser to address hazardous substance contamination even if cleanup requirements change or if IDEM determines that a response action related to hazardous substance contamination from the subsurface fill and/or previous releases is necessary. This decision, however, does not apply to past or present contamination that is not described in this Comfort Letter, future releases, or any applicable closure requirements under the Resource Conservation and Recovery Act, 42 U.S.C. § 6901.

If IDEM later discovers that the afore-mentioned investigations or other information submitted to and reviewed by IDEM were knowingly inaccurate or incomplete or if any activities undertaken by an owner or operator of the Site exacerbate the contamination found on the Site, then IDEM reserves the right to revoke this decision and pursue any responsible parties. In addition, if any acts or omissions by the Prospective Purchaser or a future owner or operator of the Site knowingly exacerbate the contamination at the Site, then this letter may be revoked. For purposes of this condition, as relates to the petroleum contamination in ground water addressed by

the Contaminated Aquifers Policy, the failure to take affirmative steps to mitigate or address contaminants will not, in the absence of exceptional circumstances, constitute an "omission" within the meaning of this condition. However, if previously undiscovered releases or threatened releases are identified, the Prospective Purchaser should ensure that reasonable steps pursuant to 42 U.S.C. § 9601(40)(D) are undertaken. Furthermore, the Prospective Purchaser recognizes that in order to maintain the status of BFPP, they will have to continue to provide the cooperation, assistance and access required by 42 U.S.C. § 9601(40)(E), and continue to maintain compliance with, and not impede the implementation of any institutional control as required by 42 U.S.C. § 9601(40)(F), as long as such controls are in place. To maintain BFPP status, the Prospective Purchaser must also comply with 42 U.S.C. § 9601(40)(C) regarding notices and 42 U.S.C. § 9601(40)(G) regarding requests for information or administrative subpoenas.

IDEM encourages the commercial/industrial development of the Site. Please be advised that any work performed at the subject property must be done in accordance with all applicable environmental laws. Furthermore, redevelopment of the Site in a manner consistent with the land use restrictions outlined below will lessen the possibility that environmental conditions at the Site could deteriorate in the future.

IDEM's Contaminated Aquifers Policy and the BFPP liability exemption require that a site owner exercise "due care" with respect to the contamination found on-site. In this case, "due care" consists of placing an environmental restrictive covenant ("ERC") on the use of the Site and, in addition, properly abandoning all known existing potable water wells on the Site pursuant to 312 Indiana Administrative Code (IAC) 13-10-2 (permanent abandonment of wells). Additionally, as a condition of this letter's effectiveness, Mother Earth, once it owns the parcels, shall grant Site access for possible future sampling and/or remedial activities performed by IDEM and/or a responsible party's designated environmental consultant/contractor as required for environmental investigation and remediation of contamination found on the parcels.

For the comfort afforded by this letter and the liability protection afforded by the applicable statutes to be effective upon taking title to the parcels that comprise the Site, Mother Earth must record an ERC on the deed(s) for those parcels. The ERC, which is attached hereto, must include the following restrictions on use of the Site which are summarized below:

- neither engage in nor allow installation of new potable water wells,
- not use the Site for residential purposes, including, but not limited to, day care facilities (e.g., daycare centers, schools and senior citizen facilities),
- not use the Site for agricultural purposes,
- maintain a ground cover of at least 24 inches of soil, or two (2) inches of asphalt/concrete in areas where surface contaminant levels of TCE exceed IDEM's January 2006 Commercial/Industrial Direct Contact Closure Levels ("TCE Affected Area"), depicted on Exhibit "B," attached hereto,
- restrict disturbance of Site soils below 16 feet bgs without prior notification to IDEM, and,

Mother Earth Minor Subdivision

November 19, 2007

Page 6 of 6

- refrain from disturbing sediments in Bowman Creek and/or the Retention Pond unless IDEM has approved a work plan for such activities.

The noted restrictions must stay in place until such time that the contamination in soil, sediments and ground water on the parcels that comprise the Site and adjoining properties has been mitigated as necessary pursuant to RISC and IDEM determines the restrictions can be removed. In order for this letter to be given effect by IDEM, the Prospective Purchaser must record this letter and the ERC (modified for each respective parcel) in the St. Joseph's County Recorder's Office on the deed for each parcel that comprises the Site. Please return a certified copy of the filed documents to:

Bill Wieringa, Project Manager  
Indiana Brownfields Program  
100 North Senate Avenue  
Room N1275  
Indianapolis, IN, 46204

IDEM and the Indiana Brownfields Program are pleased to assist Mother Earth with the development of the Mother Earth Minor Subdivision. Should you have any questions or comments, please contact Bill Wieringa of the Indiana Brownfields Program at 317-234-4860 or via e-mail at [wwieringa@ifa.in.gov](mailto:wwieringa@ifa.in.gov).

Sincerely,

  
Peggy Dorsey  
Deputy Assistant Commissioner  
Office of Land Quality

## **Environmental Restrictive Covenant**

THIS COVENANT is made this \_\_\_\_\_ day of \_\_\_\_\_, 2007, by the Mother Earth, LLC concerning the Mother Earth Minor Subdivision located at 408 West Eckman, South Bend, Indiana (together with its successors and assignees, collectively "Owner").

WHEREAS: Owner owns certain real estate in the County of St. Joseph, Indiana, which is more particularly described in the attached Exhibit "A" and made a part hereof ("Real Estate"), which Real Estate was acquired by deed on \_\_\_\_\_, and recorded on \_\_\_\_\_, as Deed Record \_\_\_\_\_, in the Office of the Recorder of St. Joseph County, Indiana.

WHEREAS: A Comfort Letter was prepared and issued by the Indiana Department of Environmental Management ("the Department") pursuant to the Indiana Brownfields Program's recommendation at the request of the Mother Earth, LLC to address the redevelopment potential of the Mother Earth Minor Subdivision project, site number BFD#4060009, a brownfield site impacted by a release of hazardous waste, petroleum, regulated substances, or hazardous substances (collectively, "contaminants of concern").

WHEREAS: The Comfort Letter, as approved by the Department, provides that contaminants of concern, specifically total petroleum hydrocarbons ("TPH") - gasoline range organics ("GRO") and TPH - diesel range organics ("DRO"), 2-methylnaphthalene, trichloroethene ("TCE"), methylene chloride, lead, arsenic, mercury, benzo(o)pyrene, and benzene will remain on or beneath the surface of the Real Estate and outlines land use restrictions that must be maintained to ensure the protection of public health, safety or welfare, and the environment. Soil and ground water at the Real Estate were sampled for volatile organic compounds ("VOCs"), semi-volatile organic compounds ("SVOCs"), metals, TPH-GRO and TPH-DRO. Sediment at the Real Estate was sampled for metals. The impacts in surficial soils appear to be related to historic industrial usage of the Real Estate and the petroleum impacts in ground water appear to be originating from an upgradient, off-Site source. Investigations revealed that current levels of contaminants were below industrial default closure levels ("IDCLs") established by the Department in the January 2006, Risk Integrated System of Closure ("RISC") Technical Guidance, with the exception of TPH GRO/DRO, 2-methylnaphthalene, TCE, methylene chloride, benzo(o)pyrene, lead, arsenic, mercury, and benzene. However, these constituents in soil are below the established closure levels for construction worker exposure. Three (3) stream sediment samples taken from Bowman Creek and a retention pond which runs through the Site were collected and detected lead levels of 123 parts per million ("ppm") (upstream), 561 ppm (midstream) and 864 ppm (downstream from retention pond). The midstream and downstream samples exceed the RISC migration to ground water and IDCL of 230 ppm. These lead detections appear to be from historic impacts from on-Site foundry sand and slag fill underlying the property and off-Site surrounding industrial facilities. Contaminants of concern remain across the Real Estate, sampling results for which are depicted on Exhibit "B", attached hereto. A list of the contaminants of concern and the concentration levels/detected parameters are set forth in Table 1, attached hereto. Documents related to the Site, brownfield site No. 4060009, are incorporated herein by reference and may be examined by searching IDEM's Virtual File Cabinet on the Web at <http://www.in.gov/idem/resources/records/index.html> using the Real Estate address.

WHEREAS: The restrictions contained in this Covenant will ensure that commercial/industrial use of the Real Estate will be protective of human health and the environment.

NOW THEREFORE, Owner, hereby, in consideration for the promises contained herein and other good and valuable consideration imposes restrictions on the Real Estate and covenants and agrees that:

I. GENERAL PROVISIONS

1. Property Conveyance- Continuance of Provisions. Any conveyance of title, easement, or other interest in the Real Estate shall be subject to compliance with restrictions described in paragraph 8, below.
2. Restrictions to Run with the Land. The restrictions and other requirements described in this Covenant shall run with the land and be binding upon, and inure to the benefit of the Owner of the Real Estate and the Owner's successors, assignees, heirs and lessees or their authorized agents, employees, contractors, representatives, agents, lessees, licensees, invitees, guests, or persons acting under their direction or control and shall continue as a servitude running in perpetuity with the Real Estate. No transfer, mortgage, lease, license, easement, or other conveyance of any interest in all or any part of the Real Estate by any person shall limit the restrictions set forth herein. This Covenant is imposed upon the entire Real Estate unless expressly stated as applicable only to a specific portion thereof.
3. Binding upon Future Owners. By taking title to the Real Estate, any subsequent owner agrees to comply with these restrictions and the terms of this Covenant.
4. Recordation. Unless this Covenant is terminated under paragraph 11, the Owner shall re-record this Covenant including any subsequent modifications and amendments forty-nine (49) years from the date of first recording, or any subsequent recordings, to ensure its continued applicability under the Marketable Title for Real Property Act found in IC 32-20.
5. Access for Department. The Owner shall grant to the Department and its designated representatives the right to enter upon the Real Estate at reasonable times for the purpose of determining whether the land use restrictions described in paragraph 8 are being maintained (and operated as applicable) in a manner that ensures the protection of public health, safety, or welfare and the environment; this includes the right to take samples, monitor compliance with the corrective action plan, and inspect records.
6. Written Notice of the Presence of Hazardous Substances. Owner agrees to include in any instrument conveying any interest in any portion of the Real Estate, including but not limited to deeds, leases and subleases (excluding mortgages, liens, similar financing interests, and other non-possessory encumbrances) the following notice provision:

NOTICE: THE INTEREST CONVEYED HEREBY IS SUBJECT TO AN ENVIRONMENTAL RESTRICTIVE COVENANT, DATED \_\_\_\_\_ 200\_\_, RECORDED IN THE OFFICE OF THE RECORDER OF ST. JOSEPH COUNTY ON \_\_\_\_\_, 200\_\_, INSTRUMENT NUMBER (or other identifying reference) \_\_\_\_\_ IN FAVOR OF AND ENFORCEABLE BY THE INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT.

7. Notice to Department of the Conveyance of Property. Owner agrees to provide notice to the Department no later than thirty (30) days after any conveyance of any ownership interest in the Real Estate (excluding mortgages, liens, similar financing interests, and other non-possessory encumbrances). Owner must provide Department with a certified copy of the instrument conveying any interest in any portion of the Real Estate and, if it has been recorded, its recording reference. Such notice shall also include the name and business address of the transferee.

## II. RESTRICTIONS AND OBLIGATIONS

8. The Owner shall:
- a) Prohibit any activity at the Real Estate that may interfere with any response activities, long-term monitoring, or measures necessary to assure the effectiveness and integrity of any response action, or component thereof, selected and/or undertaken at the Real Estate.
  - b) Not use the Real Estate for residential purposes, including, but not limited to, daily care facilities (e.g., daycare centers, schools and senior citizen facilities).
  - c) Not use the Real Estate for agricultural purposes.
  - d) Neither engage in nor allow the installation or use of potable water wells on the Real Estate. There shall be no consumptive, extractive or other use of the ground water underlying the Real Estate that could cause exposure of humans or animals to the ground water or disrupt the movement of ground water underlying the Real Estate, other than for site investigation and/or remediation purposes, without prior Department approval.
  - e) Neither engage in nor allow excavation of soil below 16 feet deep anywhere on the Real Estate without first submitting a work plan for approval by Department at least 30 days prior to beginning work. Any removal, excavation or disturbance of soil from or within the Real Estate must be conducted in accordance with all applicable requirements of IOSHA/OSHA, and soil that is removed, excavated or disturbed on the Real Estate must be managed and disposed of in accordance with all applicable federal and state laws and regulations.
  - f) Maintain a ground cover of at least 24 inches of soil or two (2) inches of asphalt/concrete in areas where surface contaminant levels of TCE exceed

IDEM's January 2006 Commercial/Industrial Direct Contact Closure Levels ("TCE Affected Area"), depicted on Exhibit "B," attached hereto.

- g) Notify the Department if there is a change in the land use and/or any zoning changes that affect the commercial/industrial use of the Real Estate.
- h) Neither engage in nor allow excavation of sediments in Bowman Creek or the Retention Pond without first submitting a work plan for approval by Department at least 30 days prior to beginning work. Any removal, excavation or disturbance of sediments from or within Bowman Creek and/or the Retention Pond must be conducted in accordance with all applicable requirements of IOSHA/OSHA, and soil that is removed, excavated or disturbed from Bowman Creek and/or the Retention Pond must be managed and disposed of in accordance with all applicable federal and state laws and regulations

### III. ENFORCEMENT

- 9. Enforcement. Pursuant to IND. CODE § 13-14-2-6(5), the Department may proceed in court, by appropriate action to enforce this Covenant. Owner agrees that the restrictions are enforceable, and agrees not to challenge the appropriate court's jurisdiction.

### IV. TERM, MODIFICATION AND TERMINATION

- 10. Term. The restrictions shall apply until the Department determines that the contaminants of concern no longer present an unacceptable risk to the public health, safety, or welfare, or to the environment.
- 11. Modification and Termination. This Covenant shall not be amended, modified, or terminated except by written instrument executed between the Department and the owner of the Real Estate at the time of the proposed amendment, modification, or termination. Within five (5) days of executing an amendment, modification, or termination of the Covenant, such amendment, modification, or termination shall be recorded with the Office of the Recorder of St. Joseph County and within five (5) days after recording, a true copy of the recorded amendment, modification, or termination shall be presented to the Department.

### V. MISCELLANEOUS

- 12. Waiver. No failure on the part of the Department at any time to require performance by any person of any term of this Covenant shall be taken or held to be a waiver of such term or in any way affect the Department's right to enforce such term, and no waiver on the part of the Department of any term hereof shall be taken or held to be a waiver of any other term hereof or the breach thereof.

13. Conflict of and Compliance with Laws. If any provision of this Covenant is also the subject of any law or regulation established by any federal, state, or local government, the strictest standard or requirement shall apply. Compliance with this Covenant does not relieve the Owner from complying with any other applicable laws.
14. Change in Law or Regulation. In the event that the Risk Integrated System of Closure ("RISC") is adopted by rule in Indiana, or in the event of any other change in applicable law or regulations, this Covenant shall be interpreted so as to ensure the continuing validity and enforceability of the restrictions listed in paragraph 8, above. In no event shall this Covenant be rendered unenforceable if Indiana's laws, regulations, RISC guidelines, or policies for environmental restrictive covenants or institutional or engineering controls change as to form or content. All statutory references include any successor provisions.
15. Notices. Any notice, demand, request, consent, approval or communication that either party desires or is required to give to the other pursuant to this Covenant shall be in writing and shall either be served personally or sent by first class mail, postage prepaid, addressed as follows:

To Owner:

Mike Morris  
Mother Earth, LLC  
1420 South Walnut  
South Bend, Indiana 46619

To Department:

Indiana Brownfields Program  
IGCN-Suite 1275  
100 North Senate Avenue  
Indianapolis, Indiana 46204  
ATTN: Bill Wieringa

Any party may change its address or the individual to whose attention a notice is to be sent by giving written notice in compliance with this paragraph.

16. Severability. If any portion of this Covenant or other term set forth herein is determined by a court of competent jurisdiction to be invalid for any reason, the surviving portions of this Covenant shall remain in full force and effect as if such portion found invalid had not been included herein.
17. Liability. An Owner's rights and obligations under this instrument terminate upon transfer of the Owner's interest in the Real Estate, except that liability for acts or omissions occurring prior to transfer shall survive transfer.
18. Authority to Execute and Record. The undersigned persons executing this Covenant on behalf of the Owner represent and certify that they are duly authorized and have been fully empowered to execute, record, and deliver this Covenant.

Dear Mr. Vijay,

Please find the attached analytical report for the samples received August 14, 2009. All test methods performed were fully compliant with local, state, and federal EPA methods unless otherwise noted. The project was analyzed as requested on the enclosed chain of custody record. Please review the comments section for additional information about your results or Quality Control data.

Feel free to contact me if you have any questions or comments regarding your analytical report or service.

Thank you for your business. ENVision Laboratories looks forward to working with you on your next project.

Yours Sincerely,

A handwritten signature in black ink that reads "David Norris".

Client Project Name: 09-02-004/Green Tech SRG

Dear Mr. Vijay,

Please find the attached analytical report for the samples received August 19, 2009. All test methods performed were fully compliant with local, state, and federal EPA methods unless otherwise noted. The project was analyzed as requested on the enclosed chain of custody record. Please review the comments section for additional information about your results or Quality Control data. Metals analyses are not included in the NELAC certification.

Feel free to contact me if you have any questions or comments regarding your analytical report or service.

Thank you for your business. ENVision Laboratories looks forward to working with you on your next project.

Yours Sincerely,

A handwritten signature in black ink that reads "David Norris". The signature is fluid and cursive.

October 5, 2009

ENVision Project Number: 2009-2141  
Client Project Name: 09-02-004/Green Tech SRG

Dear Mr. Vijay,

Please find the attached analytical report for the samples received October 1, 2009. All test methods performed were fully compliant with local, state, and federal EPA methods unless otherwise noted. The project was analyzed as requested on the enclosed chain of custody record. Please review the comments section for additional information about your results or Quality Control data. Metals analyses are not included in the NELAC certification.

Feel free to contact me if you have any questions or comments regarding your analytical report or service.

Thank you for your business. ENVision Laboratories looks forward to working with you on your next project.

Yours Sincerely,

A handwritten signature in black ink that reads "David Norris".

Dear Mr. Vijay,

Please find the attached analytical report for the samples received August 7, 2009. All test methods performed were fully compliant with local, state, and federal EPA methods unless otherwise noted. The project was analyzed as requested on the enclosed chain of custody record. Please review the comments section for additional information about your results or Quality Control data. Metals analyses are not included in the NELAC certification.

Feel free to contact me if you have any questions or comments regarding your analytical report or service.

Thank you for your business. ENVision Laboratories looks forward to working with you on your next project.

Yours Sincerely,

A handwritten signature in black ink that reads "David Norris". The signature is fluid and cursive.

David Norris
