

# Notification for Underground Storage Tanks

FORM APPROVED  
OMB NO. 2030-0049  
APPROVAL EXPIRES 6-30-88

*Bob 10/6/84*

I.D. Number **STATE USE ONLY**  
**006466**  
Date Received

## GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1974, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or, in the absence of such records, your knowledge, belief, or recollection.

**Who Must Notify?** Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means — (a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and (b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

**What Tanks Are Included?** Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: 1. gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

**What Tanks Are Excluded?** Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:  
1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;  
2. tanks used for storing heating oil for consumptive use on the premises where stored;  
3. septic tanks;

4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

**What Substances Are Covered?** The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

**Where To Notify?** Completed notification forms should be sent to the address given at the top of this page.

**When To Notify?** 1. Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974, but still in the ground, must notify by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use.

**Penalties:** Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed \$10,000 for each tank for which notification is not given or for which false information is submitted.

## INSTRUCTIONS

Please type or print in ink all items except "signature" in Section V. This form must be completed for each location containing underground storage tanks. If more than 5 tanks are owned at this location, photocopy the reverse side, and staple continuation sheets to this form.

Indicate number of continuation sheets attached

Gentlemen:

The Torrington Company has already submitted a notification for Under-ground Storage Tanks form for its South Bend, Indiana facility which is no longer in operation. Since that time, we have received a request from your office for a diagram of the facility indicating the location of the tanks. The requested diagram is enclosed along with a copy of the previously submitted notification form.

Very truly yours,  
The Torrington Company

Re: The Torrington Company  
3702 South Sample Street  
South Bend, Indiana

Dear Mr. Michael:

Per our telephone conversation of September 1, 1992, I am writing to clarify the proper procedure for pursuing a voluntary environmental cleanup action under Indiana Senate Enrolled Act 392 (Act).

It is our understanding that the Act provides a mechanism under which responsible parties can involve the Indiana Department of Environmental Management (IDEM) in the cleanup process to obtain a "certificate of completion" and a "covenant not to sue." This voluntary cleanup program will provide protection from future enforcement on a given site by the IDEM, providing all site specific requirements established by the IDEM are met. We also understand that we have the option to conduct investigation and remediation without participating in the voluntary cleanup program, but our client would not receive any legal protection against future recourse from the IDEM.

It is also our understanding that the formal program will be established under the Act by July 1, 1993. The program will allow for technical review of voluntary cleanup actions in the State of Indiana and that our client will be able to apply for acceptance into the program at that time.

In the interim if we wish to pursue investigation and/or remediation on a given site, activities should be conducted under the 1988 Interim Final Remedial Investigation/Feasibility Study (RI/FS) Guidance Document of the U.S. Environmental Protection Agency. However, since no legal agreement has been established between our client, The Torrington Company, and the Indiana Department of Environmental Management, strict adherence to the regulatory review process under the RI/FS Guidance Document does not apply. The RI/FS Guidance Document should only be used for

Mr. Max Michael

technical guidance when performing voluntary cleanups under the IDEM program to facilitate the cleanup process.

Thank you for taking time to clarify the voluntary environmental cleanup process in the State of Indiana. If you have any questions or concerns with this correspondence, please contact me at (800) 328-8246.

Sincerely,

CAPSULE ENVIRONMENTAL ENGINEERING, INC.
