

The Agenda Review Session of the Board of Public Works was convened at 10:31 a.m. on March 7, 2024, by Board President Elizabeth A. Maradik, Vice President Joseph Molnar, and Board Members Gary Gilot, Murray Miller, Briana Micou, and Board Attorney Michael Schmidt present. The Board of Public Works Clerk, Theresa Heffner, presented the Board with a proposed agenda of items presented by the public and by City Staff.

Board members discussed the following item(s) from the agenda.

OPENING OF QUOTATIONS

Mr. Miller asked why item 3. A, B & C: South Bend Fire Department Gear Washer Prep Work – Station 2, Station 6, and the Training Center were now being quoted out after being included in a change order. Attorney Schmidt advised that it was inappropriate to include these items in a change order because they were separate buildings that the work was being done on. The work still needs to be done, so it is going to be quoted separately.

Mr. Miller asked why it was initially done as a change order and now we have three (3) different quotes. He questioned what the difference is. Attorney Schmidt advised that the request was denied including them in the change order, so we removed that as an option because we didn't feel it was proper. The work still needs to be done. There are three (3) different fire stations, and so each fire station is going to be quoting it out as a separate project to replace the gear washing or to install gear washing at each different fire station. Hopefully, we will be able to get all of them done.

Mr. Gilot asked if they all could have been one (1) bid. Attorney Schmidt advised that it is possible, but he doesn't know what the funding is on each of the projects and the different geographic locations of the buildings made separate quotes ideal.

CHANGE ORDERS

Mr. Miller asked if the change order for item 6. C.: Fire Station 8 Replacement was due to the architect leaving things out again. Attorney Schmidt explained that there are a variety of things being captured by this change order, stating he would say about two-thirds (2/3) of them had some descriptions that were deficiencies in the specs. A couple of the requests were made by the city. There will be a "come to Jesus" conversation forthcoming as we work through some issues that we are having with the architect on this project.

Mr. Gilot advised that there is never going to be a perfect set of plans and specs, but if a professional service provider leaves out a lot of stuff, it is a hint not to use them again, but they don't have to win a bid to get a professional services contract. Attorney Schmidt advised that the city selects them based on their expertise and if their expertise is lacking based on how many things they left out of the original design, then they don't get repeat work. He clarified he couldn't confirm because he hadn't been on the ground for the discussions, but he thought some of the issues here have been with the particular design company. They did the past fire station and several things were taken from fire station nine (9) which is the one that is on Mishawaka Avenue. Some things that were taken from that specification did not apply to the new fire station on Twyckenham from just the size of the building and the design. The city is pushing back on the architectural design firm because some items in the specs were not correct for this facility.

OPENING OF BIDS

Mr. Gilot asked about item 2. B.: Downtown South Bend to Notre Dame Trail – Notre Dame Ave. and realized that he also sees the item being requested to advertise later on the agenda. He questioned how many phases would be in the project. Senior Engineer Charlotte Brach advised that it is two (2) phases or two (2) bid packages. The first one being Notre Dame Ave and then the second one being South Bend Avenue and Hill Street.

PROJECT COMPLETION AFFIDAVITS

Attorney Schmidt advised the Board about item 8. A.: 2020 Traffic Signal Detection Improvements. He advised that there was a utilization plan approved. This involved a variety of intersections where traffic signal work was being done and the city eliminated a portion of this through a change order. The portion eliminated happened to have been an area contracted with a WBE subcontractor. There was no WBE participation on this because we eliminated that work from the scope.

Attorney Schmidt advised the Board about item 8. B.: 2023 Contractor Paving, Round 1. He advised that there was a utilization plan on the WBE that was narrowly missed. The MBE goals were exceeded. This is due to the initial estimates at the beginning of the project for trucking.

Mr. Gilot asked in the grand scheme of things, why would a major contractor like this not figure out a way to get the rest of the way to the WBE goal rather than us giving them a good faith-effort waiver. Attorney Schmidt advised that he's sure that the Office of Diversity and Inclusion is pushing aggressively to educate prime contractors on meeting or exceeding goals. Occasionally when you're putting together the specs and then when you're bidding on those specs, there's a variety of estimating that goes into it and you can miss it by a little bit. Contract and Compliance Administrator, Darius Lipsey, explained that this involved a combination of scope changes with the trucking and also with the complexities with their union labor treatment.

Mr. Miller asked for clarification on the MWBE goals for this project and the changes that occurred. Mr. Lipsey advised that he can only convey what they explained to him, but offered to share the utilization plan changes with Mr. Miller.

REJECTION OF BIDS/QUOTATIONS

Mr. Gilot asked if there was a safety sensitive issue involved with item 6. A.: Wastewater CNG Compressor Upgrade. He noted that the item will be readvertised, but wondered if there were a safety sensitive issue involved, the engineer could flag it so that it could proceed as an emergency contract. When you're dealing with compressed natural gas, certainly there's a different statutory mechanism that we could pursue if it was determined to be an emergency.

Attorney Schmidt advised that the bidder did not submit the Responsible Bidder Ordinance (RBO) and there was an issue with meeting the goals because they utilized either an MBE or WBE from outside the geographic region.

President Maradik noted that the engineer on the project is Assistant City Engineer Jacob Klosinski, so if there was an urgency to get this done, he would have brought it to our attention as he is a seasoned engineer.
